

Hackney Residents' Views on Developments

Commissioned by GW Insights

Fieldwork dates: 30th June – 4th July 2015

Interview Method: Telephone.

Population effectively sampled: All Adults aged 18+ living in the Borough of Hackney.

Sampling Method, RDD: A sample of Hackney residents' landline telephone data was purchased from a DMA approved data supplier. A total number of 500 interviews were conducted on land-lines.

Sampling Method, Mobile RDD: A sample of Hackney residents' mobile telephone data was purchased from a DMA approved data supplier. A total number of 100 interviews were conducted with people on their mobile phone.

Sample size: 600

Data weighting: Data were weighted to the profile of all adults aged 18+ (including non-telephone owning households). Data were weighted by sex, age, ethnicity, work status, and household tenure. Targets for weighted data were derived from the 2011 National Census.

Questions: The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published.
